Compact light Group with supports on Supports Bases.

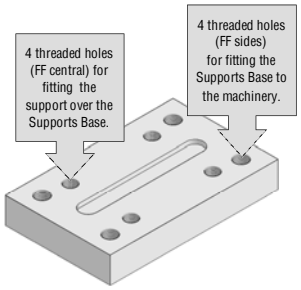

art.BD LVO **SUPPORTS BASES "BD LVO" mod.10 / 40 for Compact Light supports** in anodized aluminium alloy plate.

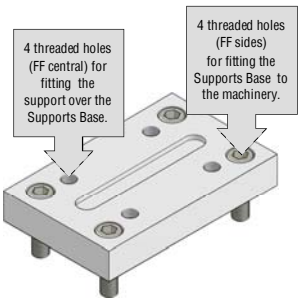

The **BD LVO Supports Bases** are fitted as standard on the mobile supports series **LVO,** and when needed also to fixed supports **DVO/A** and **DVO/B,** and are produced by us in two versions:

Version "**FF**", with all the holes threaded, which we normally recommend for use on mobile support **LVO** (the central one with nut).

Version "**FPL**" that has the same dimensions with the only difference being four countersunk through holes at the sides for hex. cap screws, recommend for fitting fixed supports **DVO/A** and **DVO/B** (those with resin bushes). The latter fitted to fixed Supports are only used in cases where needed.

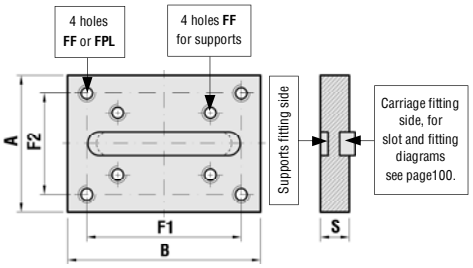

Supports Base **art.BD LVO...FF** series with threaded holes. **Normally used for mobile support with nut**

Supports Base **art.BD LVO...FPL** with countersunk through holes at sides. **Normally used for fixed Supports with resin bushes.**

Base BD LVO
Used on Compact light groups.
