art.DXA / R

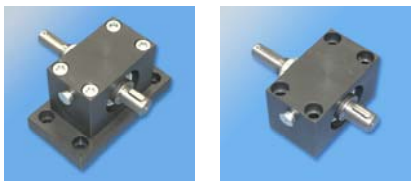

SUPPORTS FOR ROTATING SHAFTS mod.20 / 60 in nitrided steel with axial/radial bearings and accessories.

The **DXA/R** Supports with opposing conical roller bearings, are used by us inside the mobile Platforms to guide the rotation of the shaft on which are fixed the bevel gears, or pinions, or cogwheels for drive transmission, as well as the examples of use illustrated below.

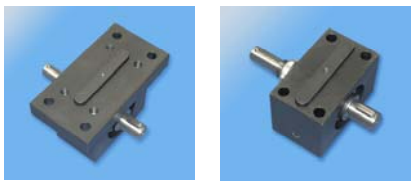

The **DXA/R** and **LXR/...** Supports, as well as being used as components on our mobile Platforms, can also be used with Supports Bases **BD LXR** (listed on the following pages) in order to even out the heights for alignment.

Assembled DXA / R Support with shaft and components / accessories.

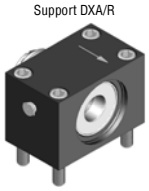

Fitting with, and without, Supports Base.

Standard fitting upside down with and without Supports Base.

Support DXA/R

Component

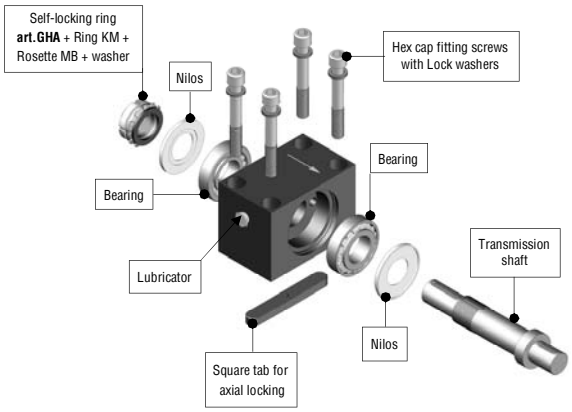

Accessory

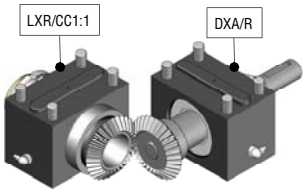

Support DXA / R - exploded diagram with components / accessories.

STANDARD

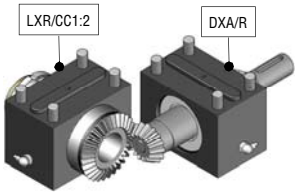

Examples of applications:

STANDARD

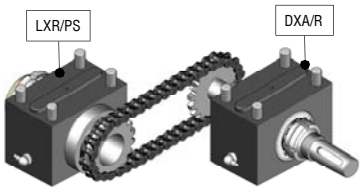

Support **DXA/R** with shaft
Combined with Support **LXR/CC1:1**

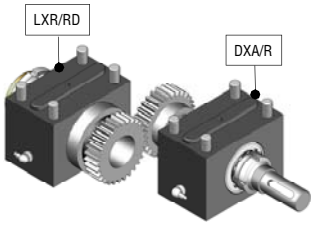

Support **DXA/R** with shaft
Combined with Support **LXR/CC1:2**

SPECIAL

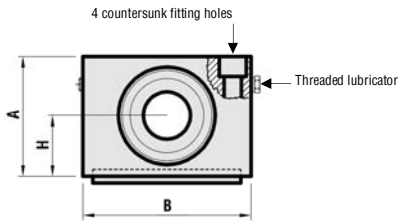

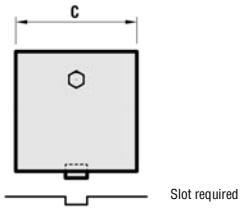

Support **DXA/R** with shaft
Combined with Support **LXR/PS.**

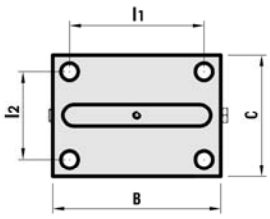

Support **DXA/R** with shaft
Combined with Support **LXR/RD.**

— **Supports DXA/R and LXR/... can also be used without Supports Bases as illustrated above, but normally they are assembled with Supports Bases BD LXR or even with the PM/BD R**

— **C = Nett size of supports excluding components**

— **Approximate weight of support with accessories and fitting bolts, Excluding Supports Base BD LXR.**
